Consumer resource for recycling electronics in Pennsylvania.

WHY RECYCLE YOUR ELECTRONICS:

- Electronics are the fastest growing segment of the waste stream. By recycling electronics, we are saving valuable resources.
- Electronic devices often contain recoverable and valuable materials such as aluminum, copper, gold, silver, plastics and ferrous metals that can be used to make new products.
- Electronic equipment contains metals that, if not properly managed or contained, can become hazardous waste. It's important to handle these materials safely so they don't become a threat to public health and the environment.
